SUMMARY

Information Technology undergraduate who develops Java OOP systems and has built full-stack (MERN) applications using AI-assisted development tools. Strong foundation in Data Structures & Algorithms, DBMS, and Operating Systems, currently deepening skills in cloud infrastructure, DevOps, and system design. Seeking a Software Engineering Internship to build scalable, high-quality software.

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript, SQL, Dart

Web & Frameworks: React.js, Node.js, Express.js, Spring Boot, Flutter, HTML, CSS

Databases: MongoDB, MySQL

CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems

Tools & Platforms: Git, GitHub, Docker, VS Code, Vercel, Render

Currently Learning: Kubernetes, AWS, Terraform, System Design fundamentals

EXPERIENCE

Development Team Lead | NexoraCrew (Startup)

2025 – Present | Tamil Nadu, India

- Led a small development team building full-stack web prototypes, planning feature scope and delegating work across frontend and backend.
- Built and reviewed React.js UI components and Node.js/Express REST APIs for founder-facing product prototypes.
- Contributing to a Flutter/Dart-based admin Activity module, extending team delivery to mobile alongside core web development.
- Ran code reviews and coordinated with teammates to keep implementation consistent and catch integration bugs early.

PROJECTS

SecureBank REST API | Java, Spring Boot, JWT, Docker

In Progress

- Building a secured banking REST API in Spring Boot, evolving from a console prototype to a Dockerized, JWT-authenticated, RBAC-secured production-style API through a 14-week guided program.

Visitor Entry & Gate Pass Management System | Full-Stack Capstone (Solo)

In Progress

- Designing and building a full-stack visitor/gate-pass management system as a 60-day solo capstone — relational schema, multi-role access, architecture/ER/API docs, and staged reviews to a live public deployment.

Financial Management System | MERN Stack (React, Node.js, Express, MongoDB)

Dec 2025 – Present

- Built a full-stack personal finance web app with JWT-based authentication and role-based access control.
- Designed a React.js frontend and Node.js/Express REST API backend with MongoDB; used AI-assisted tools to accelerate iteration, then tested and debugged by hand.
- Deployed the frontend on Vercel and backend on Render.

Crime Management System | Java, OOP, Collections Framework

- Built a menu-driven Java console application (~1,670 lines) with full CRUD operations, IPC section mapping, and report generation, using the Collections Framework and file-based persistence.

EDUCATION

JJ College of Engineering & Technology

Tamil Nadu, India

B.E. Information Technology | CGPA: [add your CGPA]

Expected 2028

Relevant Coursework: Data Structures & Algorithms, OOP, DBMS, Operating Systems, AI/ML, Theory of Computation

ACHIEVEMENTS

- Pursuing AWS solution architect associate Certification.
- Presented a paper at SPIRIT 2K26, a technical symposium at JJ College of Engineering & Technology.
- Pursuing Infosys Springboard certifications: Java Developer (Spring Associate), Full Stack Developer (Spring Boot + ReactJS), DevOps Associate Engineer.
